sub

under • beneath • below

The Latin stem sub, which we define as meaning under, actually can have a wide variety of meanings, and is sometimes shortened to suc, suf, sug, sum, sup, sur, and even sus in order to blend with the stem that follows it. Though sub often means under, it can mean beneath, below lower, somewhat, or even inferior. Here are some of the interesting words that contain sub in its various shades of meaning:

subcutaneous: beneath the skin. He was troubled by a subcutaneous infection.

subduct: to draw downward. She swam against the subduction in the offshore current,

sublunary: under the moon. The lovers enjoyed a beautiful sublunary dance.

sublimate: to express acceptably. The urge of the id can find creative sublimations. submontane: at the foot of the mountains. The submontane vegetation was more lush.

subtle: not obvious. Subtle clues told her to avoid asking about the problem.

subvert: to overthrow. They worked to subvert the established regime.

substratum: foundation. His peaceful humility was founded on a substratum of religion.

subsistence: bare survival. They survived at a subsistence level by gathering food.

subaqueous: underwater. The subaqueous habitation gradually developed into a city.

subservient: obsequious. The toady's subservient fawning irritated her.

subtrahend: number subtracted. The deduction was a fearful subtrahend from the check.

surreptitious: done in secret. The plans were made at a surreptitious meeting in the Alps.

suffuse: to fill with color. Becky Thatcher's face was suffused with embarrassment.

suffrage: voting. Women's suffrage began very late in American history.

succinct: brief and clear. Her succinct description impressed them all.

suggest: to mention. He suggested a solution, but no one listened.

suffocate: to smother. Small businesses were being suffocated by federal regulations.

suspend: to hang. The bridge was suspended from massive cables.

sustain: maintain. They were unable to sustain their initial enthusiasm.

summon: order to appear. The peremptory summons was ignored.

The Word Within the Word • Sentences #10

- 1. The orthopedist went on an African expedition.
- The mortician was mortified at the sight of the mortal wound.
- The carnivorous beasts of Venus are reincarnated after death.
- The psychologist viewed the parapsychologist with suspicion.
- 5. Ethnocentrism is disturbing to all ethnic groups.
- 6. The geneticist's hobby was studying pathogenic substances.
- 7. Prenatal care is important to natives in natural environments.
- The paleontologist was an expert on the Paleozoic era.
- 9. The discursive speech gave only cursory attention to the problem.
- 10. The cryptologist worked all night to break the enemy secret code.
- 11. The cadaver was discovered near the rushing cascade.
- 12. Decapitation was once a common form of capital punishment.
- 13. The loquacious bore answered every question with a circumlocution.
- 14. The hero's sacrifice was a sacrosanct memory.
- 15. The United Planets of the Universe soon celebrate their union.
- 16. The sky's redness and the clouds' softness were beautiful.
- 17. The broken altimeter no longer measured the altitude.
- Computer graphics enhance books on politics and economics.
- 19. The isothermal piedmont region escaped the extremes of temperature.
- 20. The new convert soon reverted to his previous views about advertisement.
- 21. To calibrate one's response is to obviate one's apology.
- 22. The extreme discordance of viewpoints prevented concord.
- 23. The lioness ate the empress but not the princess.
- 24. The post-war mutants lived in a mutagenic atmosphere.
- 25. "Tempus fugit," said the escaped fugitive caught in the whirling centrifuge.

The Word Within the Word • Notes #10

- 1. A Micropoem: Has there been a recent **expedition** to the headwaters of the Amazon? A common characteristic of expeditions is suggested by the word itself: members of an expedition go out (ex) into the wild on foot (ped).
- 2. We have all had the displeasure of listening to circumlocution. That is when someone is talking (loqu) in circles (circum). But there are two main varieties of circumlocution. There is unintentional circumlocution in which a person is talking in circles and doesn't realize it, and there is intentional circumlocution in which someone talks in circles in order to evade answering a question.
- 3. A Micropoem: A subterfuge is a clever evasion in which a person tries to avoid revealing something; it is an evasive trick, a stratagem. A literal interpretation of subterfuge might be to duck, in the sense of ducking a question, since subterfuge means to flee (fug) under (sub).
- 4. We say that a speech is discursive if it is rambling and digressive—if the speaker doesn't stick to the point. The literal meaning of discursive, however, is somewhat more exciting. A speech is discursive if it is a runaway, if it is out of control. The speaker has let the speech run (curs) away (dis) from him.
- 5. You wouldn't think that hydrogen would be an interesting word. Hydrogen is the name of the simplest and most common element in the universe, but on our planet we possess a wonderful hydrogen-based treasure: water. The importance of water to human life can hardly be exaggerated—even our bodies are mostly water. So when it was time to give hydrogen a name, the obvious choice was to name hydrogen after its most important role: hydrogen is the main ingredient in the creation (gen) of water (hydro). Hydrogen is the water-originator. No H, no H₂O.
- 6. One of the most biting terms of derision is the adjective **pedestrian**. We say that someone has pedestrian taste, or worse, a pedestrian mind. This means that the person simply never attains anything lofty or swift, graceful or elegant; he just slogs along on foot (ped), altitude zero, speed 1 mph.
- 7. The word cadaver is unusually poignant. All of our lives we live in the earth's gravitational field, and the vitality of our bodies allows us to resist that invisible force which constantly pulls down on us. We spend our lives exerting equal but opposite force to resist succumbing to gravity's mysterious force field. At the end of our lives, gravitation wins, and we fall (cad). A cadaver is a fallen person.
- 8. Unique is a perfectly self-explanatory word. It means precisely what its stem uni (one) implies. There is only one. Something cannot be rather unique; either it is one-of-a-kind and is unique, or there are other such cases, and it is not unique.
- 9. Spanish Cognates: One of the most important observations to gain from the study of the etymology of English vocabulary is that English and Spanish share thousands of words that are cognates, related words, that have common origins. Often, the English and the Spanish word share not only a stem, but even more than one stem, and often in the same order. As examples, here are some English words from this lesson, and their Spanish cognates:

orthopedist: ortopeda reincarnated: reincarnado

ingenious : ingenuo crypt : cripta cascade : cascada decapitate : decapitar

unique : único ethics : ética

indigenous: indígeno
